Subject: Microsoft case

Microsoft is probably one of the most unethical companies in the country. I hope they can be stopped, especially, their latest bullying request, the onerous, invasive, illegal, Passport. It is now impossible to register a product in the regular manner, now Microsoft requires to sign up for Passport before anybody can register one of their products. One shudders to think what they are going to do with the information and contract they end up with, by having the unsuspected public sign up for their Passport.
